MINI PROJECT – ABSTRACT

Course: Java Programming
Project Type: Java Desktop Application using **Swing UI & JDBC**
Milestone 1: Project Abstract with Team Details
Marks: 2

1. PROJECT TITLE

Title of the Project: _____

.

2. TEAM DETAILS

Sl. No.	Name of Student	Roll No.	Role	HackerRank Profile / Username	Java Stars in HackerRank
1			**Team Lead**		___
2			Team Member		___
3			Team Member		___
4			Team Member		___
5			Team Member		___

Note: Every team member shall create a HackerRank profile and complete Java practice problems. The number of **Java Stars obtained on HackerRank as on the date of submission** shall be entered above.

.

3. PROJECT ABSTRACT

Problem / Motivation

Briefly describe the problem addressed by the proposed application and explain why the application is required.

.

.

Proposed Solution

Briefly explain the proposed Java desktop application, its purpose, intended users, and how it addresses the identified problem.

.

.

Major Features

Mention the major functionalities proposed in the application.

.

.

.

.

Technologies to be Used

- **Programming Language:** Java
- **User Interface:** Java Swing
- **Database Connectivity:** JDBC
- **Database: _____**
- **Development Environment / IDE: _____**

Expected Outcome

Briefly state what the team expects to achieve after completing the project.

.

.

Team Lead Signature: _____ Date: _____

.

General Instructions

The project shall be implemented as a **Java Desktop Application with Swing-based GUI and JDBC-based database connectivity**. The proposed project should provide sufficient scope to demonstrate **Java programming, Object-Oriented Programming concepts, GUI development, database operations, exception handling, coding standards, documentation, and testing**.

The project title and abstract should clearly indicate the **problem being addressed, proposed solution, major features, and expected outcome**. Avoid overly simple applications that provide insufficient scope for demonstrating Java concepts.
